Basics of PHP, My SQL, Java, JS

accomplishments

• I'm determined to achieve my goals. I have the ability to adjust and be creative while finding solutions to the problems. For example, I earned my Web Design degree in five years while providing for my family, serving as a bishop, and helping my wife raising our children

• I'm a hard worker and I'm willing to step up to do the job. For example, as a member of editorial board for magazine project in ENG 450 class, I designed and developed the website to display content of our magazine that boosted its quality beyond course's expectations

• I have a strong leadership skills and positive attitude that motivates and incentives people I work with. Under my leadership, branch of 65 members doubled attendance and fulfilled all other requirements to become a ward

• I love learning and I have the ability to learn fast. For example, I prepared myself to take the pesticide applicator state exam in couple of weeks and passed it with high note by the first approach. Similarly, I got ready and passed the state exam for the insurance agent license

• I have a great process improvement skills. While working on wiring machine, I implemented my solutions to the process that resulted in decrease of defected parts of about 20% to near 0 level

• I have a good problem-solving skills and I know how to use resources. I had successfully established decent living conditions for my family in different countries

• I value family and invest time in it. As a result, I built my family strong in faith
